

To update the machine, please follow these steps:

1. Copy the file "Firmware.hpc" to your U Disk.
2. Insert the U Disk to the machine.
3. Press "UTILITY" key.
4. Press F5 three times to page 4, then you will see the "Update" menu on F3.
5. Press F3, then select the file "Firmware.hpc", and Press menu "Load" on F3, then update start.
6. If your machine is reset by itself, that's mean the update is OK!

FAQ:

Q: Sometimes popup "Bad File" message.

A: If the version of your DSO1060 is lower than V1.06, please format your U Disk and update again.

If the problem appears again, make sure whether your U Disk has virus or not.
